USE & CARE

METALS:

Cleaning:

Metallic, steel, aluminium and polished surfaces should be cleaned with a soft damp cloth and warm water; for persistent stains, liquid soap diluted in water can be used. After cleaning, always dry with a soft cloth or a leather cloth.

Do not use cleaning products for steel ovens, chlorine, bleach, or other aggressive detergents.

Avoid abrasive creams, score pads and abrasive sponges that can scratch metallic surfaces.

Use:

Pay attention to food stains like coffee, fruit juice and cola; if these are not removed immediately they can leave indelible marks on the surface.
