

TWIST SPINE WORKSTATIONS - ORGANIC

Designer

Enrico Frigerio by FDG

Brand

Actiu

Twist fuses the integration of connectivity and technology into the furniture. This system breaks down the regular boundaries between areas of the workspace, with a simple but lightweight frame adapting to a wide variety of configurations. The Twist system can be adapted to your work behaviours and mood, whether you need to focus or collaborate.

The Twist Spine can be linear or Organic, depending on the agile nature of your space. The Organic version allows you to plug and play desks at various points, and create non-linear patterns of desking. The Linear version is more traditional, but features more accessories, power and data integration and storage.

Features

- Light and contemporary angled leg frame
- Laminate Spine with integrated below desk storage
- The Twist Organic Spine modules connect together to create non-linear shapes.
- Seat cushions available on spine for touch down seating
- Desks are installed by plugging into the spine. single desks can be rotated to modify their position.
- Integrated cable management available
- Above desk fabric screens for privacy and modesty panels
- Supports single and double sided desk configurations
- Soft Rounded corners on worktops matches system
- Complemented by the Twist Meeting and Video Conference tables.
